No Dig India Show 2011

'UNDERGROUND IS THE FUTURE-LET'S PROTECT IT JOINTLY.'

Overview

With the growth of Indian cities, particularly the megacities, continuing at an extremely fast pace, the need for abundant infrastructure and the demand for the Underground usage is assuming enormous proportions. Added to this highly demanding scenario, failing health of existing underground infrastructure is making the situation more difficult for the urban settlements due to a slower growth in available resources and capabilities. In fact, even if a fraction of the needed infrastructure is developed or maintained through Trenchless, the capacity of Indian Trenchless industry will be challenged. It may not be able to meet the required service demand fast enough. There simply may not be enough planners, designers, and contractors to do the work and capacity development from the current levels is imperative. Failing which will lead to all round damages of buried structures as well as colossal waste of underground space. It is the later part that is more worrisome as this will lead to larger complications for our future generations and we should to protect our underground space to the maximum possible extent. IndSTT, to facilitate this mammoth need and sensitize the stakeholders, is organizing the No Dig India Show, 2011 with the theme, Underground is the Future-let's protect it Jointly.

No Dig India Shows

No Dig India Shows are the annual International Shows of IndSTT wherein the activities undertaken through the year are reported to the stakeholders and the future course of action for the next year are chartered. These shows have been organized for several years with earlier shows titled as No Dig Asia which got it's name changed to NDS in 2008. Since then they are being organized annually. Through these shows, IndSTT has been able to release several trenchless reference books like Codes of Practice, Schedule of Rates, Good Practices Guidelines etc. These publications have assisted in promoting the applications of Trenchless Technology in the nation in a major way.

No Dig India Show 2011 (NDS'11)

NDS'11 is the annual IndSTT show of year 2011 with the theme, 'Underground is the Future-Let's protect it Jointly.' It is being organized in association with Construction Industry Development Council (CIDC) from 13th to 15th December, 2011. It has been scheduled to happen in concurrence with 17th Asia Construct Conference & Exhibition for building capacities through regional cooperation. Asia Construct is the Network of Apex Organizations representing construction industry from Asian Continent and includes several Ministries of Construction, Industry Development Board & Authorities from various member nations from Asian and Pacific Rim Countries. The show is expected to provide opportunities of cooperation amongst the participants of both the events.

About The Organizer

The Indian Society for Trenchless Technology (IndSTT) is the apex autonomous organization to promote the application of Trenchless Technology in India. It was established in 1995 with the support of the Ministry of Urban Development, Govt. of India. During the ensuring sixteen years, IndSTT has supported the development of Trenchless Industry in India substantially & has made it one of the major markets for trenchless applications. IndSTT had successfully conducted several Trenchless events over this period. The last No-Dig India Show had 79 display stands, display of substantial numbers of trenchless equipment release of several technical publications, reference manuals, technical seminars & live workshop by Indian as well as foreign specialists and release of trenchless technology training website.

Show Objectives

Fueled by the market demand, the year has seen substantial activities on the front of Trenchless Technology Applications in the country. Based on them the show has been structured with the following objectives:

- To make the case that 'Underground is the Future-Let's protect it Jointly'
- To showcase the achievements of Indian Trenchless industry to the participants and promote trenchless application within the participating countries through this showcasing.
- To provide information about latest developments and changes in technology reported during the year.
- To forge partnerships amongst the different participating stakeholders.
- To provide update on market intelligence, prices, and other technocommercial matters.
- To promote trenchless applications through appropriate contractual framework.
- To protect underground through application of appropriate project operation framework.
- To protect underground through deployment of qualified workforce.
- To protect underground through engagement registered qualified persons.

In addition, similar to previous events, some new publications & revised editions of some of the IndSTT publications would be released during the show.

Invitation for Participation

Today Indian trenchless industry cannot afford to wait for decision makers to become aware of the benefits of trenchless in protecting our underground. Instead, it must be proactive and let the world know that appropriately applied trenchless helps in protecting our underground today for providing a better world to our children tomorrow. Participation in this show is quite important for trenchless stakeholders and therefore invited.

Trenchless stakeholders are invited to join the show in any one or more capacities:

- Presenters
- Workshop Organizers
- Sponsors
- Exhibitors
- Delegates

Interested persons / organizations are requested to fill the attached form for our subsequent actions.
