Managing Confined Spaces Safe Working for Engineers & Managers

In the context of trenchless project execution, confined space pose major challenges and the engineers, planners, or supervisors need to be capable to plan, procure essential inputs, and get the project executed by duly trained workmen to retain safe working environment. IndSTT provides training to workers proposed to be deployed for working in confined spaces. Through this program IndSTT is aiming to provide essential training to Managers/Engineers to successfully manage such activities or projects. The program is structured to cover the following:

1. Hazards associated with working in confined spaces
2. Various hazardous conditions associated with confined spaces
3. Basic Hazard Management Actions to address situation in confined spaces
4. Logistical consideration
5. Essential instrumentation for environmental testing
6. Necessary ventilation systems for the safe confined space work
7. Respiratory/Personal Protective Equipment
8. Training & Toolbox talks
9. Emergency preparedness & Response Parameters
10. Identification & Assessment of confined space hazards
11. Planning safe confined space operations
12. Safety Protection Measures to mitigate confined space Risks
13. Hands-on training for typical operations
14. Testing & Certification of learners

About IndSTT

Indian Society for Trenchless Technology (IndSTT) is the autonomous apex organization to promote the application of Trenchless Technology in India. It was established in 1995 and registered under SR Act of 1860 with registration number 32943 of 1998. Founders of this Society include various luminaries from the Construction Sector. IndSTT prescribes use of safe working practices through the trenchless codes of practices and specifications published by it. A majority of Indian Utility Owners use such codes and specifications in their projects and require operators and technicians to be duly trained, tested, and certified in the field of Safe Confined Space Working Training Program. This program has been designed to meet such requirements.

Speakers

Dr. Niranjana Swarup

Mr. M.K. Zaman

Mr. Aaroh Swarup

Program Delivery

Program is delivered through classroom training accompanied with *hands – on* usage of essential PPE, tools etc.

Program Fee

Program fee shall be 12,000/- per person .GST extra

Program Duration

The program duration would be 2 days.

Certification

Post Training, the learners will be tested & certified for the required knowledge gain.

Dr. Niranjana Swarup
Director General
