

Sir,

One point that is Glaring and has been raised before is:

“ Some Agency may be INDSTT, should take up a task of identifying utilities in Delhi region and every department should depute 2-3 persons on that team to systematically identify the utilities of their deptts.”

These should include:

- a) DJB,
- b) Power companies BSES and NDPL
- c) All OFC stakeholders
- d) PWD
- e) NDMC
- f) MCD

The programme should be time bound and penalties if certain department is not able to locate to mark its Utilities.

Once the information is there, it can be sold for profit to future work performers so that revenue can be generated for the expenses done.

The above is a very basis idea and need a lot of refinement.

This is THE ONLY WAY to move forward else we all will be pointing fingers at each other for the mess that Delhi is in.

Regards,  
Vipin
