

Draft text of the Directive

(To be issued to all Contractors/ Agencies executing works utilizing Trenchless Technology)

As per the **Worker Qualifications and Testing and Certification of Worker Skills** clauses of the codes of practice for Trenchless applications, it is advised to engage the services of skill certified work persons, operators, & supervisors, holding skill certificates issued by Indian Society for Trenchless Technology (IndSTT). It is therefore recommended to employ at least 40% of the total number of such work persons holding valid skill certificates.

This would ensure better quality of works, more safety and productivity & also eliminate / reduce time & cost over runs in the project.

Being issued for immediate compliance.

By order
